JCPOA
Run-sheet

Internal. Keep open during the session. Full instructions: "How to run". ***Timing: 90 minutes of play (2×45') — with the welcome, one 10-minute break, the US reveal, and the first-step debrief, ~130 minutes end to end.***
Load-bearing blocks marked ▌— never cut; unmarked blocks compress first.

Before start:

· US posture drawn (Constructive / Skeptical / Hostile) — inject texts ready to paste ☐
· rooms + 3 tracks open ☐
· shared doc editable by all ☐
· profiles renamed ☐
· HR briefed on chair duties ☐

Clock	Block	Facilitator actions
−0:15	Rooms open	Agenda posted; check profiles/ logos; brief the HR (process only, never outcomes)
0:00–0:10	Welcome & etiquette ▌	Read etiquette aloud incl. tap-out; confirm decision rules (Iran: FM alone · Council: consensus · EP: simple majority); announce timing
0:10–0:55	**Block 1 — Mandates, Openings & First Contacts** (45′)	0:10 HR opens, states goals (2′) → 0:12 team huddles: mandates & red lines (15′) — visit each room once, listen only → 0:27 opening plenary: **30″ per bloc**, Iran first, HR chairs (6′) → 0:33 HR names points of convergence and conflict aloud (3′) → 0:36 tracks open: first bargaining, free movement (19′)
0:55–1:05	Break (10′)	HR + Commission draft and post the one-page **Draft Framework; fire US-1** at the end of the break
1:05–1:50	**Block 2 — Bargaining & Adoption** (45′) ▌	No v1:05 HR presents framework (3′) → 1:08 tracks: main bargaining (17′); **fire US-2 ~1:15, no later than 1:18**; conditional injects only if needed → 1:25 plenary: HR enumerates remaining conflicts and **triages: pick the TWO decisive ones;** focused resolution, moderated (12′) — everything left unresolved stays bracketed = not agreed, which is a legitimate outcome → 1:37 **the vote** ▌: HR reads final text; Iran FM decides; Council one by one; EP votes (6′) → 1:43 closing statements, 30–60″ per bloc (7′)ote; chairs and mediates
1:50–1:55	US reveal ▌	**Fire US-3** (posture + deal/no-deal variant)
1:55–2:10	First-step debrief ▌	Decompression round → shared reality (name the model's bends: EU–Iran format, absent US/Russia/ China, EP's invented veto, 90 minutes vs. twenty months) → announce homework

Losing the clock? Cut in this order: Block 2 track time → 12′; closing statements → one per side. The vote and both debrief steps never move.

Inject cues (full texts in "How to run", section 7.3):

US-1 = end of break, fixed.
US-2 = ~1:15, no later than 1:18, once talks are genuinely moving.
US-3 = after the vote, fixed; pick deal/no-deal variant. Utility injects (max 2 per run, fire early or not at all): *leak* = deadlock breaker · *hardline speech* = premature-consensus breaker · *IAEA report* = fantasy check · *oil prices* = Iran overplaying late.

Vote order ▌:

1. HR reads the final text (only unbracketed text counts).
2. Council — each state declares, one by one, on the record.
3. Parliament — MEPs vote, majority carries.
4. Iran Foreign Minister accepts the deal or rejects the deal.

Commission and HR do not vote. Any failure = no deal; play it straight, debrief it honestly.

No-shows: Commission roles absorb into DG partner · missing MEP → announce new majority threshold · missing Council state → seat empty, veto lapses · missing Iran deputy → folds into delegation. HR or Iran FM missing → promote the DG Trade Sanctions player; recast their seat.
